***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/30/2010 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3, 5-9, 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 states, "wherein the transparency control means selects one of the transparency color bars...". The claim language is implying that there is more than one transparency control bar. As the Examiner understood the invention included more than one color bars such as the luminance/hue color bar and the transparency color bar of which the user makes a selection to utilize (Page 15, Para 0029) but not multiple transparency color bars. The Examiner suggests that the claim language be clarified to avoid the confusion of multiple transparency bars for utilization/display.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-3, 5-9, 11-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Applicant's amendments raises issues regarding the relationship of the transparency control means and the image processing means. The questions arise as to whether or not the functions of the image processing means and the function of the transparency control means being claimed to perform functions not disclosed as performing within the Specification.

6. Applicant appears claim a means for (or step for) plus function limitation and wishes to invoke 35 U.S.C. 112, sixth paragraph. The claim language states for example, "a transparency control means" and "an image processing step for". If the applicant wishes to have the claim limitation treated under 35 U.S.C. 112, sixth paragraph, applicant is required to:

- a. Amend the claim to include the phrase "means for" or "step for" in accordance with these guidelines: the phrase "means for" or "step for" must be modified by functional language and the phrase must **NOT** be modified by sufficient structure, material or acts for performing the claimed function (such as cancelling dependent claims that further provide sufficient structure); or
- b. Show that the claim limitation is written as a function to be performed and the claim does **NOT** recite sufficient structure, material, or acts for performing the

claimed function which would preclude application of 35 U.S.C. 112, sixth paragraph. For more information, see MPEP 2181.

***Claim Rejections - 35 USC § 103***

7. The rejection of Claim 1-3 & 5-20 under 35 U.S.C. 103(a) as being unpatentable over Shiki et al. (US Patent No. 7,044,913), in view of Hossack et al. (US Patent No. 6,116,244) and in view of Alexander et al. (US Patent No.6,239,796 B1) is hereby maintained.

***Response to Arguments***

8. Applicant's arguments filed 06/30/2010 have been fully considered but they are not persuasive. The Examiner notes that no new arguments with filed were the RCE on 08/30/2010. Further, the Examiner had responded to the Applicant's Remarks filed 06/30/2010 in Advisory Action mailed 07/21/2010. The issues brought up in the Advisory Action mailed 07/21/2010 have been explained in more detail in the rejections above. Until the Applicant resolves the pending 35 U.S.C. 112 rejections, the Examiner contends the 35 USC § 103(a) rejection is within the broadest most reasonable interpretation of the claims.
